The reaction begins in from 4 to 8 hours. In most instances the reaction was still quite evident at from 2 to 4 days after the inunction. No inconvenience was experienced, no rise of temperature or malaise; the usual manifestation was a red areola about the scarifications, some slight swelling, itching and in some the formation of small nodules, all of which disappeared in a week or less. In 7 cases out of 18 reported by Christian there was no reaction, although tubercle bacilli...
