DYNAMIC MODELING OF ENVIRONMENTAL SYSTEMS

Springer. Paperback. Book Condition: New. Paperback. 197 pages. Dimensions: 9.2in. x 6.1in. x 0.5in. A primer on modeling concepts and applications that is specifically geared toward the environmental field. Sections on modeling terminology, the uses of models, the model-building process, and the interpretation of output provide the foundation for detailed applications. After an introduction to the basics of dynamic modeling, the book leads students through an analysis of several environmental problems, including surface-water pollution, matter-cycling disruptions, and global warming. The scientific...
