Reviews

Totally among the best publication I actually have actually go through. It can be filled with wisdom and knowledge Once you begin to read the book, it is extremely difficult to leave it before concluding.
(Glen Ernser)

POLITISCHE IDEALE

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 34 pages. OCLC Number: (OCoLC)191803301 Subject: Nuclear facilities -- Security measures -- United States. Excerpt: . . . as the Building 3019A complex. DOE is planning to equip these buildings to dispose of uranium-233 by mixing it with other uranium isotopes to convert it into a more stable form that requires less security and that is suitable for long-term storage or disposition as radioactive waste - a process known as downblending. The downblended uranium-233 will then be placed in storage at another location at Oak Ridge, and the Building 3019A complex will be closed. Uranium-233, which is a special nuclear material, must be secured to prevent theft, among other things. However, after the material has been downblended, it will not be Category I material, and DOE will no longer have to provide it with a high level of security. According to DOE, construction of a facility at Building 3019A to downblend uranium-233 will be completed in 2011. The department estimates that carrying out its plan for the Building 3019A complex will cost about 433.3 million, including security and construction expenses. DOE, which has already begun construction activities at Building 3019A, plans to operate the facility through 2015. In addition to Oak Ridge National Laboratory, DOE stores smaller quantities of uranium-233 at other sites, including the Los Alamos, Idaho, Argonne, and Brookhaven National Laboratories, among others. The draft uranium-233 implementation plan recommends shipping some of Los Alamos National Laboratorys uranium-233 to Oak Ridge National Laboratory. In addition, the plan notes that some sites - such as Idaho, Argonne, and Brookhaven laboratories, among others - possess smaller amounts of uranium-233 that can be disposed of without processing. Although the plans recommendations vary by site, in general, the plan calls...
