National Science Teachers Association, United States, 2014. Paperback. Book Condition: New. Expanded Second Edition. 272 x 216 mm. Language: N/A. Brand New Book. This lively book contains the kind of guidance that could only come from veterans of the middle school science trenches. The authors know you re crazy-busy, so they made the book easy to use, whether you want to read it cover to cover or pick out sections to help you with lesson planning and classroom management. They also know you face new challenges, so they thoroughly revised this second edition to meet the needs of today s students. The book contains:big-picture concepts, such as how to understand middle school learners and explore the nature of science with them;a comprehensive overview of science and engineering practices, STEM, and inquiry-based middle school science instruction, aligned with A Framework for K-12 Science Education and the Next Generation Science Standards;10 new and updated teacher-tested activities that integrate STEM with literacy skill-building;information on best instructional practices and professional-development resources; andconnections to the Common Core State Standards in English language arts and mathematics. If you re a new teacher, you ll gain a solid foundation in how to teach science and engineering practices while better understanding your often-enigmatic middle-grade students. If you re a veteran teacher, you ll benefit from a fresh view of what your colleagues are doing in new times. Either way, Doing Good Science in Middle School is a rich opportunity to reaffirm that what you do is good science.
